Our Vision is a sustainable environment that enables women and men living in poverty to improve their lives

Our mission achieves this by fighting poverty and climate change – together. Through agroforestry and strengthening of farmers' organisations, to empower smallholder farmer families to reduce poverty, hunger, deforestation and contribute to increased biodiversity.

Vi Agroforestry's partnership approach recognises the importance of local partner organisations in the implementation and sustainability of our projects across the country. The role of Vi Agroforestry is to facilitate processes, exchange knowledge and provide resources for partner organisations so that they can be strong, independent and effective at all levels to better serve smallholder farmers.

Where we work:

Mwanza Region
Mara Region
Kagera Region
Dodoma Region
Mbeya Region
Songwe Region
Ruvuma Region
Dar Es Salaam

Our Working Areas:

**Gender Equality and empowerment
- of women, children and youth**

**Systems and
Governance**

**Sustainable agriculture based
on Agroforestry**

**Communication, fundraising
and resource mobilisation**

**Economic security - through agricultural value
chains and financial services**

**Policy &
Advocacy**

The ALIVE Programme - Agroforestry for Livelihood Empowerment

Our overall programme which all our below projects feed into

ALIVE Partnership - Creating societal changes to enable the realisation of human rights, gender equality and economic empowerment of small-holder farmer families through market-led, sustainable agriculture based on agroforestry.

CODE-P - Smallholder Coffee Development Project - contributing to inclusive and sustainable development of the coffee value chain for improved incomes and nutrition status of smallholder farmers, with special focus on women and youth.

Trees Sustain Life - A carbon offsetting project that promotes agroforestry practices to increase productivity, regenerate degraded lands, mitigate greenhouse gas emissions and build adaptive capacity to fight climate change.

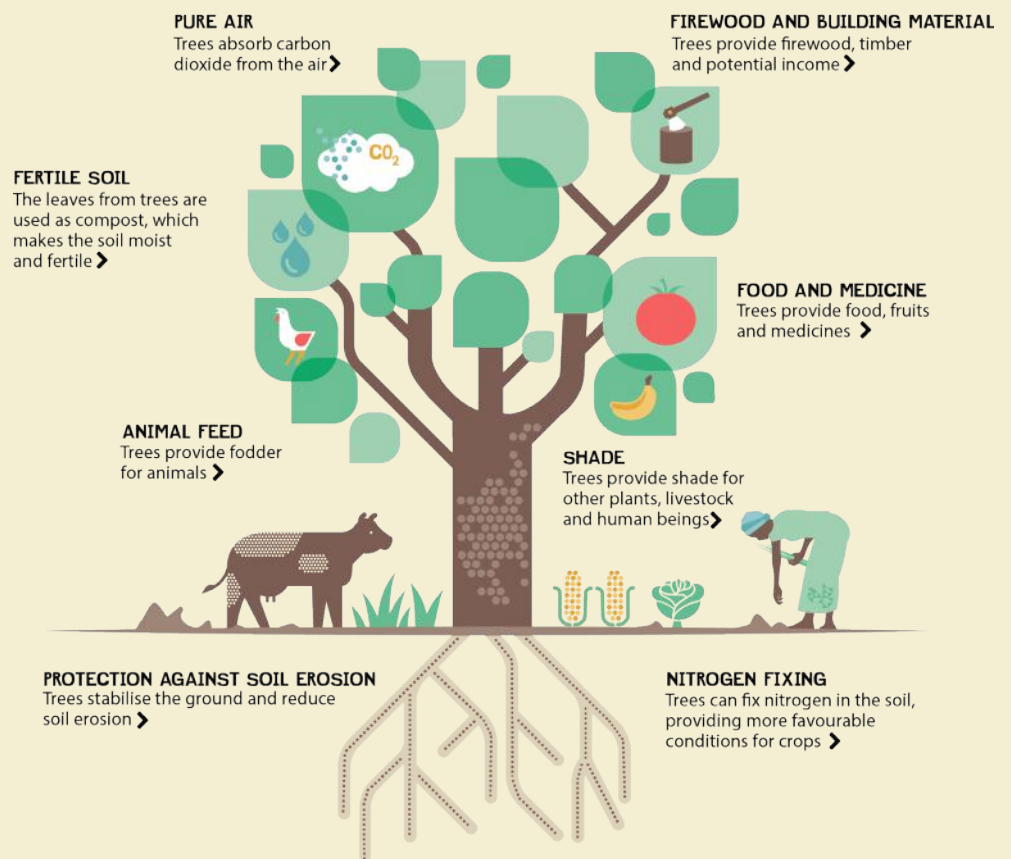

SEMA - Serengeti Mara Ecosystem Project - contributing to conservation of Serengeti-Mara transboundary ecosystems through empowering local communities to adopt sustainable livelihoods and enhancing regional cooperation.

AGROFORESTRY

Agroforestry is an environmentally friendly land use system that integrates trees, crops and animals on the same piece of land to get higher productivity.

About Us

Vi Agroforestry is a Swedish development organisation fighting poverty and climate change through Agroforestry and Sustainable Agricultural Land Management in Tanzania, Kenya, Rwanda and Uganda. Since its inception in 1983, Vi Agroforestry has contributed to the planting of over 134 million trees and has helped more than 2.4 million people out of poverty over the past 10 years.
